Chapter 2

Literature Review

2.1. Literature Review based on various research paper

Brad J.C. [1], during the research found that exactly some difficult methods were adopted in lifting the vehicles for reconditioning, repair and maintenance. Fabricated model has mainly concentrated on the difficulty, and hence a suitable device must be designed, such that the vehicle and heavy objects can be lifted from floor level without the application of force. The device must be light weight, easy to handle, and should be capable of lifting the vehicle to an considerable height, with a lifting arm attached to front side of the gantry of van, and yet be capable of lifting a load of a 1000-1500 pound vehicle off the ground. Further, it should be stable and easily controllable by a crank or a hand-lever with a low force a position of safety. It should be easily movable either by a position underneath the vehicle, or by a low-lifting mechanism, and support surface designed to be engaged by a jack. Thus, the present invention has been developed considering all the above requirements. The particular design of mechanical automated scissor lifting jack has resulted in power to be beneficial in lifting and lowering of heavy loads.

Prasad R.S. [2] during the research found that in cities car parks are typically manually operated and therefore require some physical effort on the part of the user. Such parks create difficulties for the elderly, handicapped, and women's. Disadvantages in bad weather conditions. The low degree of safety leads to the cause of accidents within full in the parks. The innovation proposed the designer be automated to reduce human effort and increase safety. The invention provides a mechanism for lifting a vehicle from a position of safety. It can easily movable and other support surface, is not required. Thus, the design has been developed considering of the above requirements. This is the beneficial in lifting and lowering of loads.

Yashi S.S. [3], stated that most of the present day resources of energy are limited and nonfeasible and next generation will face acute energy crisis if alternate resources of energy are not developed concurrently. They found that in today's developing world, the extent of automation is obviously the foremost focus of engineers. Servo jack is a device which is used to lift and support a heavy load in automotive vehicles, such as a car. The

***Abstract*— This document gives formatting instructions for authors preparing papers for publication in the Proceedings of an IEEE conference. The authors must follow the instructions given in the document for the papers to be published. You can use this document as both an instruction set and as a template into which you can type your own text.**

***Keywords*— Put your keywords here, keywords are separated by comma.**

I. Introduction

This document is a template. An electronic copy can be downloaded from the conference website. For questions on paper guidelines, please contact the conference publications committee as indicated on the conference website. Information about final paper submission is available from the conference website.

II. Page Layout

An easy way to comply with the conference paper formatting requirements is to use this document as a template and simply type your text into it.

A. Page Layout

Your paper must use a page size corresponding to A4 which is 210mm (8.27") wide and 297mm (11.69") long. The margins must be set as follows:

- Top = 19mm (0.75")
- Bottom = 43mm (1.69")
- Left = Right = 14.32mm (0.56")

Your paper must be in two column format with a space of 4.22mm (0.17") between columns.

III. Page Style

All paragraphs must be indented. All paragraphs must be justified, i.e. both left-justified and right-justified.

A. Text Font of Entire Document

The entire document should be in Times New Roman or Times font. Type 3 fonts must not be used. Other font types may be used if needed for special purposes.

Recommended font sizes are shown in Table 1.

B. Title and Author Details

Title must be in 24 pt Regular font. Author name must be in 11 pt Regular font. Author affiliation must be in 10 pt Italic. Email address must be in 9 pt Courier Regular font.

TABLE I
Font Sizes for Papers

Font Size	Appearance (in Time New Roman or Times)		
	Regular	**Bold**	**Italic**
8	table caption (in Small Caps), figure caption, reference item		reference item (partial)
9	author email address (in Courier), cell in a table	abstract body	abstract heading (also in Bold)
10	level-1 heading (in Small Caps), paragraph		level-2 heading, level-3 heading, author affiliation
11	author name		
24	title		

All title and author details must be in single-column format and must be centered.

Every word in a title must be capitalized *except* for short minor words such as "a", "an", "and", "as", "at", "by", "for", "from", "if", "in", "into", "on", "or", "of", "the", "to", "with".

Author details must not show any professional title (e.g. Managing Director), any academic title (e.g. Dr.) or any membership of any professional organization (e.g. Senior Member IEEE).

To avoid confusion, the family name must be written as the last part of each author name (e.g. John A.K. Smith).

Each affiliation must include, at the very least, the name of the company and the name of the country where the author is based (e.g. Causal Productions Pty Ltd, Australia).

Email address is compulsory for the corresponding author.

C. Section Headings

No more than 3 levels of headings should be used. All headings must be in 10pt font. Every word in a heading must be capitalized except for short minor words as listed in Section III-B.

1) Level-1 Heading: A level-1 heading must be in Small Caps, centered and numbered using uppercase Roman

Since final year projects provide you with enough time duration, if spent qualitatively you can build a very innovative mechanical final year project and get a great learning experience. By doing so, you will not only develop an innovative final year project but also develop valuable skills needed for a successful career in core technologies related to mechanical engineering. Since final year projects provide you with enough time duration, if spent qualitatively you can build a very innovative electronics final year project and get a great learning experience. By doing so, you will not only develop an innovative final year project but also develop valuable skills needed for a successful career in core technologies related to electronics engineering. What Is IEEE? The IEEE reference format is a commonly accepted style for writing, formatting, and citing research papers.
